

TOWNSHIP OF McNAB/BRAESIDE

FIELD INVESTIGATION FOR 2020 CAPITAL ROADS PLAN VILLAGE OF BRAESIDE

Field investigation for planned future roadworks in the Village of Braeside will begin shortly. The roads within the 2020 Capital Roads Plan are shown below. The majority of the field investigation work will be within the road right-of-way. Surveyors will gather information on neighbouring properties, such as elevations at the house and driveways, to aid in the design process. They will not need to enter any homes or businesses. A geotechnical investigation will also be completed and will include drilling holes in select locations along the streets to determine construction requirements.

A public information session will be held (anticipated to be in the fall of 2019) to provide information on the recommended improvements and to obtain feedback prior to the development of the detailed design, construction documents, and timing of the works.

Thank you for your patience and understanding.
